Submitted on 2 Jul 2018

HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

Addendum to: Assessment of Digital Image Correlation Measurement Errors: Methodology and Results [Experimental Mechanics 49(3)]

The synthetic speckle images that were used to perform the simulations can be downloaded from the following website:

http://www.gdr2519.cnrs.fr/image_database/ExpMech2009_vol49-3_pp353-370/

The readers interested in assessing the metrological performance of their own DIC software are invited to download these files, to use them as input data and to discuss matters related to their results with the authors.
