1.2 Summary of the Action

This action will contribute to the sustainable and inclusive development of Greenland and the diversification of its economy by supporting the education sector. It will increase the collective welfare and well-being and enhance the skills of the youth and existing workforce, building on previous EU-Greenlandic cooperation in this area. An educated workforce is a pre-requisite to develop any new economic sectors, particularly those relevant to Green Growth and Global Gateway. Building on experience from previous programmes and the upcoming revised Greenlandic education strategy expected in 2023, this action will use budget support and technical assistance to support particularly technical education, re- and up-skilling, e-learning as well as mental health.

The Overall Objective (Impact) of this action is to contribute to the sustainable development and diversification of the Greenlandic economy.

1. Increase quality in the education system as well as learning outcomes and entrepreneurial and innovation skills, emphasising projected labour market demands.
2. Reduce inequality, improve wellbeing of students and boost cohesion and inclusiveness in society.
3. Increase efficiency in the education sector (including spending) and completion rates in upper secondary education and Vocational Education and Training (VET), as well as progression from lower secondary

2 RATIONALE

2.1 Context

The strategic role of Greenland is increasing (raw materials, climate change, Arctic matters, security, and connectivity), and is attracting attention of global players (such as the US and China), warranting a proactive EU. While firmly committed to its long-standing partnership with the EU, Greenland is increasingly looking to diversify its economic and political relations. The EU's partnership with Greenland comprises a sustainable fisheries agreement (since 1985; currently around EUR 21 million of financial compensation for Greenland annually) and
